

How to calculate the rebate for purchasing photovoltaic brackets

How does a solar PV rebate work?

For example, if your solar PV system was installed in 2022, installation costs totaled \$18,000, and your state government gave you a one-time rebate of \$1,000 for installing the system, your federal tax credit would be calculated as follows: $\$18,000 * 0.30 = \$5,400$

How does a utility rebate affect a solar tax credit?

When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit. For example, if your solar PV system installed in 2022 cost \$18,000, and your utility gave you a one-time rebate of \$1,000 for installing the system, your tax credit would be calculated as follows:

Where can I find solar rebates & tax credits?

You can use the Database of State Incentives for Renewables & Efficiency (DSIRE) to find rebates and state tax credits available in your ZIP code. Some states have a statewide tax credit that you can apply in addition to the federal solar tax credit.

What is the federal tax credit for solar photovoltaics?

One of the many things this act accomplishes is the expansion of the Federal Tax Credit for Solar Photovoltaics, also known as the Investment Tax Credit (ITC). This credit can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system. The ITC increased in amount and its timeline has been extended.

Are solar rebates taxable income?

Rebates you receive from your utility to install a solar system are not considered taxable income when you go to file your federal returns. They will decrease your federal solar tax credit as the rebates reduce the cost of the system installation.

How do I calculate my solar tax credit?

Calculating the amount of your federal solar tax credit is very simple. Take the total cost of your system and multiply it by 0.30. For example, if you spent \$25,000 all-in on going solar (parts, labor, permits, etc), then your tax credit would be worth \$7,500. $\$25,000 \text{ (gross cost)} * 0.30 \text{ (30\% tax credit)} = \$7,500$ Residential Clean Energy Credit

For example, if your solar PV system installed in 2022 cost \$18,000, and your utility gave you a one-time rebate of \$1,000 for installing the system, your tax credit would be calculated as follows: $(\$18,000 - \$1,000) * 0.30 = \$5,100$
