

# How to change the national standard of photovoltaic inverter

Will the 2023 NEC change the installation of photovoltaic (PV) systems?

Introduction. There have been changes throughout the entire 2023 NEC that may affect the installation of photovoltaic (PV) systems.

What is a PV standard (PV Module and PV Inverter)?

The Sustainability Leadership Standard for PV modules and PV inverters provides a framework and standardized set of performance objectives for manufacturers and the supply chain in the design and manufacture of PV module and PV inverter components.

How do PV inverters work?

Originally, PV inverters were designed with transformers to boost converted alternating current (AC) voltage to the higher utility service levels. This transformer provided galvanic isolation of the DC side of the PV system from the AC conductors of the premises wiring system and its grounding electrode system.

Do PV systems comply with the NEC?

in detail in the NEC. The IFC requires that systems comply with the National Electrical Code. Electrical components connected to a PV system must meet requirements that detail where, when, and how labels are applied.<sup>31</sup> The main

Which code articles impact PV installations?

Additional Code articles that impact PV installations include 691, Large-Scale Photovoltaic (PV) Electric Supply Stations; Article 706, Energy Storage Systems; Article 480, Storage Batteries; and the entirety of Chapters 1 through 4, with Article 250 and Article 300 being commonly referenced.

What is a sustainability standard for photovoltaic modules & inverters?

The Sustainability Standard for photovoltaic modules and inverters is a set of product sustainability performance criteria and corporate performance metrics that exemplify sustainability leadership in the market.

Standard String Inverters Also known as a central inverter. Smaller solar arrays may use a standard string inverter. When they do, a string of solar panels forms a circuit where DC energy flows from each panel into a wiring harness that ...
