

How to connect photovoltaic panels to supercapacitor wires

Use the scheme to connect the 2 supercapacitor banks on their respective places on the balance board - the big holes. All other circuits, including the solar panel are soldered in the same place - all plus wires (brown) on the positive plate, all ...

Step 3: Run the grounding wire to your panel. In the third step, run the grounding wire from the rod to your solar panel array. Attach the wire to the frame of the array with a grounding clip or other similar device. Make sure ...
