

# How to disassemble the handheld dual-wheel photovoltaic panel

How can Palmetto help you remove and reinstall solar panels?

At Palmetto, our solar professionals are here to help you remove and reinstall solar panels. They can review your situation, provide helpful guidance to ensure your panels are cared for, take care of fixing your home and panels, and make sure your solar power system is reinstalled properly.

How do you remove a solar panel?

Dismount the Solar Panel by Removing Bolts, Screws, and Clamping Nuts: If this is not a portable solar panel and you need to move it, you should remove the bolts, screws, and clamping nuts at the mounting hardware used to fix the panel in place.

How do dual axis solar panels work?

Dual axis solar panels are actively controlled using electric motors or hydraulic rams. As the sun moves, so too does the solar panel. As the relative position of the sun to the solar panel changes only slowly, it is not necessary to constantly move the solar panel.

How to disconnect solar panels?

Turn Off DC and AC Disconnect Switch: As commented in the safety precautions, the first step when disconnecting solar panels is switching off circuit breakers.

Should I remove or reinstall my solar panels?

Solar removal and reinstallation may also be necessary when you're moving to a new home, and you wish to relocate your system. If that is the case, make sure you have a trained installer handle the entire job so it's done safely and securely to protect your investment. Can I Remove and Reinstall My Solar Panels Myself?

Should you remove solar panels when not generating power?

Cover the Solar Panel: Even though you should disconnect solar panels at hours when they are not generating power, you should always try to cover them with opaque cloths before removing them. Doing this will ensure no solar generation, making it safer to disconnect the modules.
