

How to inspect the photovoltaic panels after installation

Do I need an inspection before installing solar panels?

An inspection before installation is necessary to ensure that your property's electrical system can handle the addition of solar. If you're installing a rooftop solar panel system, an engineer will also need to inspect your roof's structure to make sure it can withstand the additional weight of the solar panels and racking equipment.

How does a solar panel inspection work?

A solar panel inspection reviews your solar panel system after installation. The inspector (either a local government employee or someone from an inspection service) will schedule an appointment with you at your home to review the entire system. Sometimes, your permit fees cover the inspection, but this depends on your local government.

When should solar panels be inspected?

Here are the recommended times for solar inspections: 1. Pre-Installation Inspection Before the installation of solar panels, a thorough inspection should be conducted to assess the site suitability, roof condition, and electrical infrastructure.
