

How to install solar panels for home use

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I install a solar energy system?

Installation requires mounting the panels to your roof (or wherever you plan to install them), connecting them to one another and an inverter, and syncing your home's electrical system so energy goes toward your appliances and devices. Your panels may include specific instructions. Here are the typical steps to install a solar energy system. 1.

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

How do I choose a solar panel system for my home?

Before you size a solar panel system to fit your energy needs, consider undergoing a home energy audit to uncover anything that makes your home less efficient. Switching to energy-efficient lighting and appliances or weatherizing your home may help to lessen your electricity expenses. 2. Determine if your home is structured for solar

How does a solar installer install a roof?

Any open holes in your roof shingles will be sealed to prevent leaking. The installer will then install the solar panels to the racking and connect the electrical wiring. They'll also install any additional equipment, such as an inverter or battery bank. Many solar installers can complete installation in just one day.
