

How to install the photovoltaic inverter cover

How do I install a solar inverter cover?

To install a solar inverter cover, start by putting the cover together. Then, attach it over the inverter and any extra items like switches, wifi dongles, and cables that you want to keep safe. Our covers come with comprehensive installation instructions and the components required for assembly and wall mounting.

Do I need a solar inverter shade cover?

If your solar inverter is exposed to direct sunlight, your warranty with the inverter manufacturer could be void. In this case we recommend using a solar inverter cover to protect your inverter and its warranty. An inverter shade cover is a valuable accessory for your solar inverter.

How to maintain a solar inverter?

Without a solar inverter, the energy harnessed by your solar panels would be unusable. Therefore, keeping your inverter in top condition is essential for the overall performance of your solar system. Your solar inverter should be put in a cool, shaded spot with good airflow to avoid getting too hot. Make sure it's easy to reach for maintenance.

Where should a solar inverter be installed?

Where you install the inverter can really affect how well it works. The best place to install your solar inverter is in your garage. This location is much more protected compared to installing your solar inverter outdoors. If the garage doesn't work, your solar technician will put the inverter on a wall outside near your meter box.

How to connect a solar panel to a inverter?

Begin by connecting the positive and negative leads of the solar panel to the corresponding terminals on the inverter. Then, connect a charge controller between the solar panels and the inverter to manage the current flow and protect the inverter from damage. You can also connect DC MCB or Surge Protection Device between the panel and controller.

How do I remove the inverter cover?

Use the following procedure to remove the inverter cover. 1. Switch the inverter ON/OFF/P switch to OFF. 2. Enter SetApp and in the Commissioning screen, select Maintenance > Standby Mode > Enable. 3. Wait five minutes for the capacitors to discharge. 4. Switch the Safety Switch to OFF. 5.

An adequately sized PV service disconnect box must be used prior to making the connection between the junction box and the solar inverter. By connecting on the Line side, it avoids de-rating the existing service panel and avoids back-feed ...
