

How to install the universal bracket for photovoltaic panels

How do you install a solar panel bracket?

The end brackets will have a spot to hold a single panel, and the middle brackets will have a spot to secure two panels. Some solar panel kits may use single panel brackets. The basic is to position the bracket to capture the panel and then tighten the bolt that clamps the bracket to the panel.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

Where should I use the brackets on my Unistrut?

Use of the above brackets depends on the orientation of your unistrut. If the unistrut is running perpendicular to the solar panel then the most likely way to use these brackets would be on the top and bottom rails of the panel. Alternatively, you could use these brackets - also from Rich Solar - anywhere in any orientation.

How do I connect a solar panel to a strut?

If the unistrut is running perpendicular to the solar panel then the most likely way to use these brackets would be on the top and bottom rails of the panel. Alternatively, you could use these brackets - also from Rich Solar - anywhere in any orientation. Options for connecting panels to strut are in two basic classes.

How do solar panel brackets work?

Solar panel brackets are just a nut and bolt attachment. They come in a variety of styles, and each is slightly different. Many slide onto the solar frame railings and then tighten to hold the panel in place. The end brackets will have a spot to hold a single panel, and the middle brackets will have a spot to secure two panels.

How do I Mount my solar panels?

Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the EcoFlow Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels.
