

# How to make wind power generation wind

Wind turbines work on a simple principle: instead of using electricity to make wind--like a fan--wind turbines use wind to make electricity. Wind turns the propeller-like blades of a turbine around a rotor, which spins a generator, ...

Most wind turbines use electromagnetic generators, which generate electricity through the interaction of magnetic fields and conductive coils. 5. Nacelle. All these components are housed within a protective enclosure called the nacelle, ...
