

How to remove the negative wire of photovoltaic inverter

Remove the negative wire from the common busbar. If you're using an insulation resistance tester like the 1587, attach the red lead from the meter to the negative PV string circuit wire. Attach the black lead from the meter to ground. Isolate ...

Attach the cables from the charge controller to the positive and negative terminals of the battery bank to hook up solar panels to batteries. Double-check the polarity to avoid reverse connections. Connect to the Inverter: If you have an inverter ...
