

# How to use the roof tools on photovoltaic panels

Installing your own solar panels on your roof might seem like a massive undertaking, but it really isn't. You may be entirely capable of doing it yourself! We'll walk you through a DIY solar installation step-by-step a little ...

While solar panels can usually be safely and effectively installed on all roof materials, the exact installation processes may differ. As such, there is no &quot;best&quot; roof for solar - panels can go on just about any roof material. Below, ...
