How do people invest in solar energy?

Individuals can invest in the solar energy industry by putting money into companies involved in some part of the solar power supply chain, including manufacturers of solar panels and operators of solar energy facilities. Individuals can also profit from solar energy by installing solar panels on their homes.

Are solar panels a good investment?

The electric power sector contributes up to 25% of all greenhouse gas emissions nationwide, according to the EPA. Using renewable energy helps reduce the use of fossil fuels and their harmful emissions. Installing solar panels typically increases the overall value of your home.

Should you buy a solar energy system?

A solar electric system provides an opportunity for anyone who is looking to reduce monthly utility bills and make a long-term, low-risk investment. Solar panels are viewed as upgrades, like a renovated kitchen or a finished basement, so purchasing a solar energy system will likely increase your home's value.

What is solar investing?

Solar investing encompasses investments in various aspects of the solar energy supply chain. Perhaps you invest in companies like First Solar (ticker: FSLR) that produce large-scale solar panels. It might even mean investing in a popular company like Tesla (TSLA) that hopes to create smaller solar products for homes.

Is solar energy a sustainable investment?

As more individuals, companies and governments become concerned about global climate change caused by carbon emissions, there's an increased interest in renewable energy as part of a socially responsible investing portfolio. One of the most often-cited types of alternative energy is solar power. [6 Places to Find Sustainable Investments.](#)

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.
