

What are China's new investment guidelines for solar photovoltaic manufacturing projects?

China's Ministry of Industry and Information Technology has finalised new investment guidelines for solar photovoltaic (PV) manufacturing projects, as reported by Reuters. The move aims to curb overcapacity in the sector, a persistent issue that has led to a significant drop in prices.

Why is the solar photovoltaic market growing?

The government in many countries has imposed stringent carbon emission norms due to which the focus towards the renewable sector is increasing, particularly towards solar photovoltaic generation. This is expected to push this market towards growth during the forecast period. Request a Free sample to learn more about this report.

Why is PV Manufacturing important?

Developing U.S. PV manufacturing could mitigate global supply chain challenges and lead to tremendous benefits for the climate as well as for U.S. workers, employers, and the economy.

What is a photovoltaic component manufacturing capacity map?

The U.S. Photovoltaic Component Manufacturing Capacity map includes any active manufacturing site in the U.S. and their nameplate capacity, or the full amount of potential output at an existing facility, as of January 31, 2022. This does not imply that these facilities produced the amount listed.
