

# Is it safe to install photovoltaic panels on color steel

Can you put solar panels on a metal roof?

As manufacturers of metal roofing panels, we at Western States Metal Roofing are often asked if you can put solar panels on a metal roof. The short answer is yes, you can put solar panels on a metal roof. However, there are some things to know first. [Can You Use Solar Panels On A Metal Roof? FAQ's Answered: Interview With A Solar Installer](#)

What is the best roof color for solar panels?

When it comes to roofing materials for solar panels, steel is a popular choice due to its durability and ease of installation. The best color for a light-colored metal roof, such as gray or brown, when installing solar panels is recommended. Light-colored roofs reflect sunlight, which helps to keep the solar panels cool and prevents them from overheating.

Are metal roofs better than solar panels?

Metal roofs are durable and can outlive your solar panels. Solar panels can increase the cooling benefits of a metal roof. Metal roofs and solar panels are great choices for climate-conscious homeowners. Typically, your solar installer will drill holes in your roof so that they can attach the mounting for your solar panels.

Can you install solar panels on an aging asphalt roof?

You definitely don't want to install solar panels on an aging asphalt roof, which could cost you down the line: If you need to replace your roof before your solar panels, you'll waste money removing and re-installing your panels. Metal roofs, on the other hand, are the most durable conventional roofing material available.

Can thin film solar be installed on a metal roof?

Thin-film solar can only be installed on certain types of roofs, and standing seam metal roofs are ideal surfaces for it. While regular panels offer higher efficiency per square foot, thin-film solar panels have a lower profile and are easier to install.

How much does it cost to install solar panels on a metal roof?

The cost to install solar panels on a metal roof is approximately \$19,000. This cost is justified considering the little to no maintenance required, fire resistance, and a 20 to 30-year lifespan. Thin-film solar panels are another great choice for use on metal roofs.
