

What are China's investment guidelines for solar PV projects?

BEIJING, Nov 20 (Reuters) - China's industry ministry on Wednesday finalised investment guidelines for solar photovoltaic (PV) manufacturing projects in an effort to rein in overcapacity, according to a notice on the ministry website. The guidelines direct companies to ensure a minimum capital ratio of 30% for solar PV projects.

How many photovoltaic projects in China have faulty monitoring instruments?

Two field-testing engineers from different Chinese project certification companies estimated that 80% of photovoltaic projects in China have faulty or wrongly configured monitoring instruments, which can result in either under- or overstating production estimates in acquisition contracts.

Does China finalise new investment guidelines for PV Manufacturing?

“China finalises new investment guidelines for PV manufacturing” was originally created and published by Power Technology, a GlobalData owned brand. The information on this site has been included in good faith for general informational purposes only.

Is China's PV industry hindered by poor network interconnections?

Zou et al. (2017) utilized the technology innovation system method to prove that the development of China's PV industry was hindered by poor network interconnections, inconsistent competition subjects, and lack of market supervision.

What are the risk factors for photovoltaic project development in China?

China-specific risk factors for photovoltaic project development are identified. High cash flow risk and lack of legal recourse inhibit private sector investment. Opaque public tenders and rent-seeking lead to low field performance. High-level reform attempts fail to gain traction due to vested interests.

Will China's dpvg pilot program increase installed capacity?

On 20 June 2021, China's National Energy Administration (NEA) issued a notice regarding a pilot program for whole-county pilot rooftop DPVG development, which has led to a significant increase in new installed capacity in the distributed PV market (Chen and Gao, 2023).
