

What is the optimal bidding strategy for a renewable-based virtual power plant?

Optimal bidding strategy of a renewable-based virtual power plant including wind and solar units and dispatchable loads [J] A risk-based gaming framework for VPP bidding strategy in a joint energy and regulation market [J] Iranian Journal of Science and Technology, Transactions of Electrical Engineering, 43 (2019), pp. 545 - 558 H. Wang, L.

What is a combined bidding model for a wind plant?

The energy and ancillary service markets were considered in to formulate the combined bidding model for the wind plant and the CAES. The CAES can handle the uncertainty in the bidding process to realize higher profits and less conservation.

What is wind power bidding strategy?

Wind power bidding strategy in the short-term electricity market [J] Day-ahead optimal bidding of microgrids considering uncertainties of price and renewable energy resources [J] Combined bidding strategy for wind and thermal power based on information gap decision theory [J]

Do wind power producers and hydropower units benefit from combined bidding?

It is verified that both wind power producers and hydropower units benefit from the combined bidding strategy. Also, the system can reduce premiums and subsidies as the imbalances decrease. In , the risk-averse bidding strategy was proposed for wind-hydro combination with only partial information available.

Can hydrogen energy storage be used in a combined bidding strategy?

With the development of power-to-gas (P2G) technology, hydrogen energy storage, another form of energy storage, can also be applied in a combined bidding strategy. Market frameworks are also studied in some papers. Chen et al. (2022) proposed a semi-centralized market mechanism for energy storage in the day-ahead market.

Can wind power and photovoltaic power mitigate uncertainties?

Combined Bidding Considering the Complementary Characteristics of Wind and Solar Gomes et al. (2016) pointed out that the combination of wind power and photovoltaic power can mitigate uncertainties. The combined bidding strategies were developed in and .
