

Where are PV power stations located in China?

It should also be noted that with the rapid development of China's PV industry, increasingly more eastern provinces built large-scale PV power stations, including Jiangsu, Anhui and Shandong Province. Areas of PV power stations for each province of China.

Where are solar power plants located?

From the perspective of geographical distribution, larger solar power plants ( $\geq 100\text{MW}$ ) are sparsely distributed in remote locations from urban areas, particularly in the northwest region, notably Qinghai and Xinjiang.

Is Jinko the world's largest solar cell factory?

Jinko's total annual cell production capacity is expected to reach 30 GW by the end of 2021. Chinese module manufacturer JinkoSolar has started construction on its 20 GW solar cell factory in Chuxiong, Yunnan Province. The company claims it will be the world's largest cell factory once operational.

How to determine the installation year of a solar power plant?

Then, we utilized the Continuous Change Detection and Classification (CCDC) method (Zhu and Woodcock, 2014) to determine the installation year of each solar power plant combined with 30 m Landsat satellite images and the obtained solar power plant location, thereby obtaining a spatiotemporal solar power plants dataset.
