

Large-scale solar power station in Inner Mongolia

How many GW of solar will be installed in Inner Mongolia?

Upon completion, the massive installation will include 8 GW of solar, 4 GW of wind, and 4 GW of upgraded coal capacity. Three Gorges New Energy has revealed that it has broken ground on a massive solar-plus-storage project in Inner Mongolia's Kubuqi Desert.

Will a mega solar power plant help China's low-carbon energy transition?

Employees check a solar power plant in Kubuqi desert, the Inner Mongolia autonomous region, in April. [Photo/Xinhua] The construction of a mega solar and wind power base in North China's Inner Mongolia autonomous region will further facilitate the country's low-carbon energy transition and ensure domestic energy security, industry experts said.

Will China's Three Gorges new energy build a solar-plus-storage mega-project in Inner Mongolia?

China's Three Gorges New Energy has started building the first 1 GW phase of solar-plus-storage capacity for a planned 16 GW mega-project in Inner Mongolia's Kubuqi Desert. Upon completion, the massive installation will include 8 GW of solar, 4 GW of wind, and 4 GW of upgraded coal capacity.

What is the world's largest solar power base?

A mega solar and wind power base under construction in China's seventh-largest desert Kubuqi in the Inner Mongolia Autonomous Region, is set to become the world's largest power generation base of its kind.

Where is China's largest solar power plant located?

Once a coal mining site, the Otog Front Banner, Ordos in Inner Mongolia is now home to the Mengxi Blue Ocean Photovoltaic Power Station, China's largest single-capacity solar power plant. The facility is designed to generate 5.7 billion kilowatt-hours (kWh) of electricity every year, sufficient to power two million households.

Why is China building a solar power plant?

The construction comes as China - already a world leader in renewable energy innovation and production - has been ambitiously expanding its solar and wind power projects across the country to achieve clean climate targets over the past years.
