

Leading enterprise of energy storage grid-connected cabinet

Are grid-connected energy storage systems a new concept?

As renewable power generation accelerates and concerns around the capacity and resiliency of energy grids grow, companies are increasingly exploiting and developing energy storage systems. But grid-connected energy storage systems are not a novel concept and have existed for years. Why is energy storage important?

Are battery energy storage systems the leading technology for new projects?

Although several competing UES technologies with differing characteristics are matched for certain applications, battery energy storage systems (ESSs) are emerging as the leading technology globally for new projects. Thus, this Leaderboard is focused on battery technologies and the companies responsible for their integration.

How are energy storage companies rated?

These companies are rated on 12 criteria: vision; go-to-market strategy; partners; production strategy; technology; geographic reach; sales, marketing, and distribution; product performance; product quality and reliability; product portfolio; pricing; and staying power. Which companies are the leading global vendors for energy storage systems?

Why is Panasonic a leading energy storage company?

Thanks to a wide and varied portfolio of solutions, Panasonic has positioned itself as one of the leaders in the energy storage vicinity. Panasonic is one of the industry's top names due to its advances in innovative battery technology alongside strategic partnerships and extensive experience in manufacturing high-quality products.

What is energy storage & why is it important?

This energy storage can be used to smooth out power usage and seamlessly transition to an always-on battery-enabled power supply whenever needed. By doing so, organizations can reduce OpEx costs, such as peak demand charges, on an ongoing basis.

Is energy storage a separate asset?

EASE has successfully defined energy storage as a separate asset (neither generation nor consumption) and has enabled operators to own and operate energy storage within their asset portfolio. Since 1996, Clerens worked as a consultant for a private company specializing in European Affairs in Brussels.

Vertiv(TM) DynaFlex BESS, Integrated Modular Design. The Vertiv(TM) DynaFlex BESS uses UL9540A lithium-ion batteries to provide utility-scale energy storage for mission-critical businesses that can be used as an always-on power supply.
