

Lease rooftop solar power generation cooperation

Can I lease a rooftop solar system?

When leasing a rooftop solar system through IGS Energy, you'll start to save from day one. Homeowners pay only the fixed monthly electricity bill, resulting in long-term cumulative savings that allow you to spend your savings on what matters most. How long is an IGS Energy rooftop solar lease? The lease is for 25 years.

What is a solar lease?

A solar lease allows you to rent your system for a fixed monthly payment-- like renting a home or apartment. IGS Energy owns and maintains the solar system. A solar lease is ideal if you're looking for a simple, maintenance-free way to reduce your energy costs while supporting a cleaner environment.

Are community solar panels better than co-op solar?

Community solar is a great option for people who rent their homes, live in condo buildings, or don't have a suitable roof. Co-ops, on the other hand, are a good option for Americans who want the benefits of installing rooftop solar arrays but are concerned about upfront installation costs and "soft costs" like permitting.

Does Aspen Power offer a long-term lease?

Aspen Power provides landowners and businesses with guaranteed, long-term lease payments to develop solar projects on underutilized land and rooftops. This can be a straightforward and effective way to secure income while making use of space that would otherwise go unused. Contact us today to learn more about hosting a solar project.

Is rooftop PV adoption Inequity an emerging energy justice issue?

More broadly, as highlighted in the introduction, PV adoption inequity is sometimes viewed as an emerging energy justice issue. Further, the under-utilization of LMI rooftop space could reduce or at least decelerate the realization of the benefits of rooftop PVs as a clean energy resource by reducing PV market potential.

Can I lease a commercial property for solar?

You can lease your commercial property for solar and receive the financial and tax benefits of solar. We offer commercial solar leases for your commercial properties, including rooftops and parking lots, plus a storage option. Utility bill credits turn the local electric grid into a solar battery, storing the value of solar energy for later use.

The NCUC approved Eagle Solar & Light's application to lease solar power generation in October. That marked a solar-market first in the state. "The leasing of solar energy facilities is a critical component of the bipartisan HB 589 ...
