How long do solar lights last?

Most outdoor solar lights last around eight hours on a single charge, though this lifespan can decrease based on the amount of direct sunlight it receives during the day and the time of year. For example, Aityvert's solar torch lights last up to 12 hours during summer but just five hours during winter.

How long do solar lights take to charge?

Most solar lights need around eight hours of sunlight to charge and provide full-strength light. When you first install your solar-powered lights, let them charge for a couple of days to reach full capacity. Can you use regular AA batteries in solar lights?
