

# List of successful bidders for photovoltaic energy storage

Which solar-plus-storage projects were bidding in Germany's latest innovation auction?

All the bidding projects from Germany's latest innovative auction were a combination of solar with energy storage. Image: Convergent Energy + Power. Germany's latest innovation auction has awarded contracts to 32 solar-plus-storage projects with a cumulative capacity of 408MW.

How were solar bidders selected?

The selection of the bidders was based on the most competitive prices offered, which also met all the RfP requirements. Kiran Jethwa, managing partner of one winning developer, Fumase, told PV Tech: "We had expected the tariffs to drop a bit. At the current prices, solar is competitive with some of the thermal power plants.

Why are solar photovoltaic (PV) tenders becoming more popular?

Protecting the environment and developing the green economy is becoming a focus for businesses and property owners as well as utilities and governments. This is driving an increase in the number of solar photovoltaic (PV) tenders being issued to award contracts for project construction and maintenance.

How much does a solar-plus-storage project cost?

The prices for successful bids ranged between EUR0.0678/kWh (US\$0.073/kWh) and EUR0.0917/kWh and the average volume-weighted price was EUR0.0833/kWh, which the Bundesnetzagentur said was "well below" the maximum tendered price. The auction sought solar-plus-storage projects on arable grasslands, with different criteria offered for different states.

How many MW is a solar photovoltaic (PV) worth?

In the end, a total of 2,036 MW was awarded to solar photovoltaic (PV) in the first renewable energy auction held since July 2017. Overall, the auction had attracted offers worth 9,700 MW. The weighted average price for solar PV reached EUR 24.47 (USD 29.67) per MWh.

How many mw was awarded in a solar-plus-storage tender?

As usual, the solar tender was significantly oversubscribed, luring 98 proposals of 493 MW in total, against a target of 100 MW. The awarded capacity was 100.55 MW, coming from 18 projects. The bid price ranged between EUR 0.0355/kWh and EUR 0.0521/kWh. January 2020, 609 MW awarded in 2nd solar-plus-storage tender.
