

# Location of Yeh Solar Power Station

Where are PV power plants located in China?

Eventually, we established a map of PV power plants in China by 2020, covering a total area of 2917 km<sup>2</sup>. We found that most PV power plants were situated on cropland, followed by barren land and grassland, based on the derived national PV map. In addition, the installation of PV power plants has generally decreased the vegetation cover.

Where is China's new solar power plant located?

The plant, situated in the Yalong River Basin of the Tibetan Autonomous Prefecture of Garze in southwest China's Sichuan Province's Yajiang County, will cover the needs of 700,000 households for a whole year with its annual generating capacity of 2 billion kilowatt-hours (kWh).

How big are PV power plants in China?

The total area of the PV power plants in China is about 897 km<sup>2</sup>, based on Dunnett's dataset. We manually modified this dataset with Google Earth's background to ensure that the PV samples are located inside the PV power plants.

Does China have a spatial map of PV power stations?

Although some researchers released several PV power station maps, most only met a medium resolution of 30 meters [9,10]. There thus still lacks a national map of China's PV power stations with a higher spatial resolution (i.e., 10 meters) that could provide a global understanding of PV's spatial deployment patterns.

Which power station is part of China's first phase of Lianghekou?

State-run foreign-language news channel CGTN says that the power station project is part of China's first phase of the Yalong River's Lianghekou Hydropower Station, which started operations in March. Unlike others, the Kela PV power station is equipped with an installed capacity scale of one million kilowatts for a hydro-solar power grid.

What is China's first hydropower station?

As China strives to ensure energy security and achieve its dual carbon goals, Kela is the first hydropower station built during the 14th Five-Year Plan period (2021-2025) on the Yalong River Clean Energy Base.
