

Longi 540w photovoltaic panel parameters

What makes Longi a good solar module?

A testament to LONGi's innovative prowess (via a cross-licensing agreement with Shin-Etsu Chemical Co., Ltd) and commitment to long-term module performance is the incorporation of Gallium-doped silicon wafers (opposed to Boron) mitigating the effects of Light-Induced Degradation (LID) in a P-Type mono silicon solar module.

Is Longi LR5-72HBD a bifacial solar module?

The LR5-72HBD is LONGi's bifacial solar module purpose-built to harvest reflective photons. However, Efficiency gain figures are entirely subjective depending on installation obstructions to the rear of the module and the surrounding reflective environment. Overall Class.

Can Longi modify a product manual or installation manual?

LONGi reserves the rights for modifying product manual or installation manual without noticing in advance. It is recommended to visit our website regularly at [www.longi.com](#) for the latest version of this installation manual.

What is the clamp size for a PV module?

For framed PV module, the clamp must overlap the module frame at least 8 mm (0.32 inch) but no more than 11 mm (0.43 inch). The cross section of clamp can be adjusted if the module is securely fastened. For frameless PV module, the clamp must overlap the module frame at maximum 15 mm (0.59 inch).

Can Longi mono-facial modules be matched with other mounting systems?

LONGi Mono-facial modules can be matched with the mainstream mounting systems in the industry. The test load of module with typical mounting systems are as follows. As for other special mounting systems which are not included in the table below, please consult LONGi customer service personnel.
