

Looking to buy sunflower-shaped solar panels

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Are smartflower solar panels expensive?

Most of Smartflower's beautiful and unique sun-tracking solar sculptures aren't purchased by homeowners. Cost is a big reason. Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

What is a Flower Solar Panel?

The Flower Solar Panel, specifically the Smartflower system, is a ground-mounted solar panel known for its stunning design. Its unique feature includes petals that fold together and unfold whenever the Sun is out. This solar panel is packed with smart features in its installation, mounting, settings, and repair.

Are flower shaped solar panels space efficient?

The 'SmartFlower' solar panel system, with its flower shaped design, is space efficient; the structure is an all-in-one solar system, meaning that all the technical aspects of the product are housed in its base. All you need to do is plug in the product, and it's ready to go.

How big is a smartflower solar panel system?

Rooftop solar panel systems may need to be customized to account for several variables like roof type and space availability, but with the ground-mounted SmartFlower module, you have the freedom to install the system wherever there is sufficient exposure to sunlight. The unit itself is 194 square feet.

What makes the smartflower different from other ground-mounted solar panels?

The Smartflower offers two unique features that distinguish it from other ground-mounted solar panel systems with tracking capabilities. The first is that it has a self-cleaning function, which ensures that dirt or other grime on the panels won't cause reduced energy production. The second is that it's self-contained.

While you can get more solar installed for less with a traditional photovoltaic system, the Smartflower can still save you a ton of money over the next 25 years. With 5,510 kWh of electricity produced per year in Los Angeles, the ...
