

# Magic Cube Energy Storage System

What is the MC cube-T energy storage system?

Two days before BYD launched the MC Cube-T, battery giant Contemporary Amperex Technology Co Ltd (CATL, SHE: 300750) launched its new energy storage system Tianheng on April 9. The Tianheng is a standard 20-foot containerized energy storage system powered by CATL's energy storage-specific L-series long-life lithium iron phosphate cells.

What is BYD MC cube?

BYD launched its first energy storage system based on blade batteries, the BYD MC Cube, at a solar-related trade show today, according to a live video replay. The energy storage system is equipped with blade battery cells that have passed pinprick tests and adopts a technology called CTS (cell to system).

What is a magic cube?

Similarly, one may define a magic cube to be an arrangement of numbers in a cubical grid so that the sum of the numbers on the four space diagonals must be the same as the sum of the numbers in each row, each column, and each pillar.

Will BYD MC cube-T reshape the value of energy storage?

The BYD MC Cube-T has a capacity of 6.432 MWh, and the upgraded capacity will reshape the value of energy storage, it said today in a post published on its WeChat account.

What is the capacity of BYD MC cube-T?

BYD's MC Cube-T has a capacity of 6.432 MWh, higher than the 6.25 MWh of the Tianheng energy storage system launched by CATL 2 days ago. (Image credit: BYD) BYD (HKG: 1211, OTCMKTS: BYDDY) has launched its next-generation energy storage system, the MC Cube-T, as it looks to capitalize on opportunities in a fast-growing new market.

How do energy storage systems work?

The energy storage system is equipped with blade battery cells that have passed pinprick tests and adopts a technology called CTS (cell to system). These blade batteries use a module-less, pack-less design and are integrated directly into the system, reducing the number of components by about 36 percent, the company said.
