

Make solar panels from foam boxes

DIY solar air heating collectors are one of the better solar projects. They are easy to build, cheap to build, and offer a very quick payback on the cost of the materials to build them. They also offer a huge saving over equivalent ...

Take a piece of foam board insulation (I had mine laying around from the previous owners of our house, I also used some parts of a pool noodle), and cut to size to fit around the back and sides of your box. Use your high heat caulk ...
