

Making solar power with a wooden stick

How do you make a solar light planter?

Building solar-powered lights can be child's play if we stick to easy-to-find items like clay pots, glass bowls, and even wine bottles. For example, to make a solar light planter, I pick up any size of clay pots from the dollar store, stack them nicely, and place a solar light on top. Glue can secure the light if needed.

How can I attach a solar light to a candle stick?

To attach a solar light to a candle stick, first remove the plug at the base of the solar light using a hand saw if necessary. Apply a ring of hot glue around the center of the candle stick. Place the solar light's slip UNO fitter lampshade onto the ring of hot glue and let it dry. Apply additional hot glue to the top of the slip UNO fitter lampshade ring to secure the solar light.
