

Manufacturer of polycrystalline photovoltaic panel string welding machine

Which solar cells can be soldered with ecoprogetti Stringer machines?

Ecoprogetti's stringer machines are designed to work with all the solar cells available on the market (from 166mm to 210 mm), full and half cut. The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process.

What is a solar Tabber Stringer machine?

The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process. The solar tabber stringer machine is used to weld solar cells to strings.

What is ms100b MBB PV cell soldering Stringer?

MS100B MBB PV Cell Soldering Stringer is a fully automatic machine used to solder the mono-Si or poly-Si cells into a string. It can work with 156-220 (3BB-15BB) cells or 156-220 (full, half-cut or 1/3-cut) cells after upgrade. Update the traditional PV line to the newest MBB solar panel production line.

What is a solar Stringer machine?

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the soldering of the connections is what enables the photovoltaic module to transmit electricity.

How does a photovoltaic module manufacturing line work?

The first phase in a photovoltaic module manufacturing line is joining the solar cells, which is done by a solar tabber and stringer, a totally automatic machine able to optimise the very delicate phase of stringing and tabbing.

Why should you choose Tabber & stringer for PV module production lines?

Tabber & Stringer for PV module production lines. Our combined Tabber & Stringer machines are accurate, reliable and easy to operate. Our proven technology, combined with a modular design and advanced features are key factors for a very low Total Cost of Ownership and high productivity.

An automatic Bussing machine is used for welding of busbars and interconnection in solar module production. The Bussing machine is compatible with 156-230mm, 5BB-20BB, half-cell/full-cell busbar soldering, cycle time 22 s/module, and ...
