

Microgrid Industry Development Report

How big is the microgrid market?

Microgrid Market size was valued at USD 17.8 Billion in 2023 and is anticipated to grow at a CAGR of 20.5% between 2024 and 2032. It is a localized energy system capable of operating independently or in conjunction with the main electrical grid.

Why is the global microgrid market growing?

The global microgrid market is witnessing significant growth, driven by the demand for reliable and efficient energy solutions across various sectors, including commercial and industrial buildings, remote areas, and healthcare facilities.

What are the major drivers of the global microgrid market?

One of the significant drivers of the global microgrid market is immediate financial, specialized, ecological, and social advantages from utilization of microgrids. Besides, microgrids work with settling on ongoing force dispatch choices, which helps in limiting misfortunes and expanding benefits.

What are the key factors affecting the microgrid market?

The microgrid market is expected to have a robust growth during the forecast period, primarily due to two main factors, i.e., the global demand for clean energy generation and a self-sufficient source of power generation in times of crisis or grid disconnection.

Why are key market players investing in Microgrid technology?

Key market players are heavily investing in research and development to innovate and improve microgrid technologies including advancements in energy storage systems, smart grid technologies, and integration of renewable energy sources.

What are the opportunities for the microgrid market?

The innovation-oriented endeavors and the funding feasibility studies in many countries are the biggest opportunities for the microgrid market. Apart from independent power generation, microgrids have evolved with high-speed control platforms and forecasting systems that make them more sophisticated.

Microgrid Market Size & Trends . The global microgrid market size was estimated at USD 76.88 billion in 2023 and is expected to grow at a compound annual growth rate (CAGR) of 17.1% from 2024 to 2030. Rising power demand in ...

This report forecasts volume and revenue growth at global, regional, and country levels and provides an analysis of the latest industry trends in each of the sub-segments from 2018 to 2030. For this study, Grand View Research has ...
