

Middle East Air Transport New Energy Storage Line

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage(batteries) will be the leading energy storage solution in MENA in the short to medium terms,led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

How does the Middle East & North Africa strategy affect renewables?

Within the Middle East and North Africa (MENA) region,the increased industrial activityand drive towards renewables is reflected in each country's strategy. Continuous population growth and economic develop-ment have placed pressure on existing power assets and in some cases,created a significant gap between electricity production and demand.

Will energy storage expand in MENA?

The current utility business model limits the prospects of energy storage expansion opportunities, unless driven by direct governmental support. Auctions in MENA have been a major driver for renewable energy deployment, most notably for solar and wind, but only a few have included energy storage.

Why are energy storage systems being integrated in MENA?

The pace of integration of energy storage systems in MENA is driven by three main factors: 1) the technical need associated with the accelerated deployment of renewables,2) the technological advancements driving ESS cost competitiveness,and 3) the policy support and power markets evolution that incentivizes investments.

What is happening in the Middle East & North Africa?

The Middle East and North Africa saw 2019 again confirm the growth and importance of commissioning large projects and launching additional phases of their renewable energy and solar programs (Morocco, Egypt and the UAE) and other countries of the region are coming on board.

Will UAE deploy 300mw/300mwh of battery energy storage capacity?

The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC. Sungrow has signed another battery storage supply deal with renewable energy and sustainable infrastructure developer Doral for projects in Israel.

It's the latest in a line of fact-finding and trial deployments of battery energy storage in Brazil. Energy-Storage.news reported in April 2017 that Engie is trialling novel zinc batteries from Eos Energy Storage "to their ...
