

# New energy upstream and downstream energy storage companies

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

How is the energy storage industry changing?

The energy storage industry continues to rapidly expand, creating opportunities for new entrants and incumbents alike. As the market grows, many system integrators are evolving their business model to create a stronger competitive footing.

What are independent energy storage stations?

Independent energy storage stations are a future trend among generators and grids in developing energy storage projects. They can be monitored and scheduled by power grids when connected to automated scheduling systems and meet the relevant standards, regulations and requirements applicable to power market entities.

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism, segments and targets. Investor participation is beneficial for the development of the energy storage industry.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What are downstream investment and operating strategies?

Downstream investment and operating strategies must account for the fundamental shift in regulations and demand trends, but also the competitive pressure from emerging market supply where overinvestment in refining capacity may continue.

The 2024 oil and gas industry outlook explores five trends and industry drivers that are expected to play an important role in shaping the strategies and priorities of O&G companies in the upcoming year: Energy transition: Prudently ...
