Mounts, SnapNrack, Tamarack Solar, Wiley, and Zomeworks.

What are solar panel mounts and racks?

Solar panel mounts and racks are specialized equipment systems used to secure and stabilize solar panel arrays. They can be used to mount solar panels on a building roof, on poles in the ground, or even on a tracking device. Fixed and stationary mounting hardware is the most commonly used method for mounting solar panels.

What is the best solar panel racking system?

IronRidge and DPW offer the best solar panel racking systems. They excel in both roof, ground, and top-of-pole solutions. These premium mounts are the highest quality and fastest for solar panel professionals and DIY installers alike.

What is a solar racking?

The solar rack is the hardware under the solar module that secures the panel to a surface (roof, ground, pole) in the panel installation. If you don't get this right, then forget it—you are just buying yourself years of trouble. In this learning article, we will focus on how to select the proper solar racking.

How much does a solar racking system cost?

Mounting systems are the metal racks that hold up solar panels either on roofs or on the ground. In terms of cost, mounts and racking typically account for about 10% of the total cost of an average solar system. For example, if your solar system cost \$10,000, the racking system portion would be about \$1,000 of the total cost.

Where can I find a solar racking solution?

Blue Pacific Solar's advisors often recommend IronRidge for solar racking solutions due to their experience and versatility. IronRidge is a popular choice for roof mounting solar systems in the US.
