

New regulations of the National Development and Reform Commission on solar power generation

What is the State Council's new energy development plan?

The State Council released a circular on the implementation plan to promote the high-quality development of new energy in the new era, drawn up by the National Development and Reform Commission and the National Energy Administration, on May 30.

What is the purpose of the National Development & Reform Commission?

To encourage the construction of offshore wind power bases and promote the deployment of offshore wind power in deep-water and offshore areas. (National Development and Reform Commission, 2022b) Steadily promote structural transformation and accelerate the transformation of green and low-carbon energy.

What reforms were urged in the field of new energy?

More administrative reforms were urged in the field of new energy, such as higher efficiency in project approvals, optimized procedures for new energy projects to connect to the power grid and better public services system.

What is the installed capacity of non-fossil energy generation?

The installed capacity of non-fossil energy power generation ranked first in the world, with the installed capacity of wind and solar power generation reaching 280 GW(kW) and 250 GW respectively (National Development and Reform Commission, 2022a).

How are electricity generation rights determined in China?

Thus, generation rights and the dispatch order of electricity (i.e., the way available sources of electricity generation are ranked) in China are determined administratively rather than on the basis of marginal cost and economic merit, as is common in most market-based systems.

Will China establish certification standards and identification system for green electricity consumption?

According to Article 5 (11) of Document 1044, China will establish certification standards and identification system for green electricity consumption using GECs as the only voucher for proving the power users' green electricity consumption and certifying green attribute of their energy usage.
