InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

How much does a solar system cost?

While it might be easy to find prices advertised as "wholesale," discount pricing doesn't really kick in until you buy larger quantities than most homes need (at least 30 panels, often more). 2. You know you've gotten a great deal on an installed solar system when you're paying about \$3.40 per watt.

Does surplus solar offer inventory pricing?

Inventory pricing is not listed and will be provided by request. At Surplus Solar Products Inc. we purchase both new and used surplus solar energy material then match that material with you. Our stock is constantly changing, but frequently includes solar electric panels in a broad range of wattages, frame sizes and colors.

Should you buy solar panels from a wholesale company?

Other companies purchase surplus or discontinued models and resell them to homeowners. But take care. Older panels may not meet modern efficiency or technical specifications. Purchasing wholesale solar panels can save you money, but it's easy to get burned. Learn how to get the best deals and be a smart wholesale buyer.

Should I buy a big-enough solar system?

With a big-enough system (20 to 30 panels or more), you might qualify for a bulk discount. Your favorite big-box store is able to sell for less because they buy in enormous quantities. Often these come in "complete kits" that market themselves as "everything you need" to start your personal age of solar independence.

Should you buy wholesale solar equipment?

There are many benefits to buying wholesale solar equipment and streamlining your supply chain processes. Lower priced arrays help more people go solar. You probably got into this business because you believe in solar as an affordable renewable energy source and want to do your part to make it accessible to all.
