

Photographing the wind blades taking off

Can you photograph in windy conditions?

Windy conditions present a challenge for landscape photography. Your subjects may move around, and your tripod and camera can also be affected. It becomes difficult to capture sharp photos. So, the question is: Can you effectively photograph during windy conditions? Or do you put your camera away when it gets windy?

How can I use windy conditions to capture unique landscape photos?

Windy conditions can be used to capture unique landscape photos, as demonstrated in this example where the strong winds created top of the waves that were blown away as they curled towards the shore. Avoid bracketing if possible when photographing in windy conditions, as blending a shot with moving elements is very difficult.

How do you get creative when a photo is windy?

When photographing in windy conditions, use the motion of your subject to get creative. Inexperienced photographers often put their camera away during windy conditions, but the wind presents another opportunity to explore creativity. Watch this video to learn more and see what you can achieve.

How can I use a camera in windy conditions?

When photographing in windy conditions, use a tripod to keep your camera steady. I sometimes hang my camera bag on the hook on the center column of my Induro tripod to add extra weight and stability. Here are some tips for working in very windy conditions: Use a tripod to keep your camera steady.

How can I take a good shot in windy conditions?

In windy conditions, try to avoid bracketing if possible. Blending a shot with moving elements like grasses, trees, and clouds is very difficult due to the 'ghosting' effect. To take a good shot, lower your tripod to the ground and pull your hat down around your ears, as shown in the example below.

How can I work in windy conditions?

Here are some tips for working in windy conditions: Use a tripod to keep your camera steady. I sometimes hang my camera bag on the hook on the center column of my Induro tripod to add some weight and stability when needed.
