

Photovoltaic GEM listing conditions

What happens if a solar PV system goes out of synchronization?

In case of grid failure, or low or high voltage, solar PV system shall be out of synchronization and shall be disconnected from the grid. Once the grid comes into service PV system shall again be synchronized with grid supply and load requirement would be met to the extent of availability of power. 4 pole isolation of inverter

What are the requirements for a solar PV module?

shall be as follows: Solar PV Modules:- Poly Crystalline make solar module not less than 300 Wp each and having valid IEC certificate. (Certificate to be submitted on shortlisting of successful Tenders). The PV Cell and the modules shall be of INDIAN MAKE. Inverter

Which data acquisition system is required for a solar PV plant?

per regulation. 9. DATA ACQUISITION SYSTEM / PLANT MONITORING Data Acquisition System shall be provided for each of the solar PV plant. Remote Monitoring and data acquisition through Remote Monitoring System software at the site with latest software/hardware configuration and service connectivity for

Can a bidder apply only gem portal?

Yes. So bidder could apply only GeM portal. 4.5 VMS BUTU reserves the right to reject any or all the Tender or split the work contract at VMS BUTU. The broad specifications of the system (Detailed Specifications are given in the Tender elsewhere) shall be as follows: Solar PV Modules:- Poly Crystalline make solar

What are the requirements for solar panel installation?

system, shall be submitted by the vendors. The ground clearance of the bottom most edge of solar panel shall not be less than 1200 mm. AC, DC cable shall be of ISI mark and reputed make. Lightning arrestor shall be provided for each of the Solar Rooftop installations. The system cost shall be inclusive of supply of solar modules, inverters, mounting

What is grid tied solar rooftop photovoltaic (SPV) power plant?

connection transformer downstream. The captive power plant has one DG sets 380 KVA, totaling (UPCL Contract demand) 250 KVAh. 1. DEFINITION A Grid Tied Solar Rooftop Photo Voltaic (SPV) power plant consists of SPV array, Module Mounting Structure, Power Conditioning Unit (PCU) consisting of Maximum Power Point Tracker (MPPT), Inverter, and Controls &
