

# Photovoltaic bracket Zeruitong Steel is reliable

What types of solar photovoltaic brackets are used in China?

At present, the solar photovoltaic brackets commonly used in China are divided into three types: concrete brackets, steel brackets and aluminum alloy brackets. Concrete supports are mainly used in large-scale photovoltaic power stations. Because of their self-weight, they can only be placed in the field and in areas with good foundations.

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect &#174; Solar offers several advantages compared to pure zinc coatings.

Are ZM coated steels good for roll forming?

ZM-coated steels are excellently formable and particularly suitable for roll forming. Their surface is harder than that of zinc coatings, which means significantly less abrasion is generated in the die, and this in turn reduces wear on the forming dies.

What are the technical difficulties in assembling section steel brackets?

In short, there are many technical difficulties in the production process of the assembled section steel bracket, which requires metallurgical engineering and technical personnel to overcome technical barriers and further reduce its use cost.
