

How big is the solar photovoltaic (PV) market?

The market is expected to grow from USD 399.44 billion in 2024 to USD 2,517.99 billion by 2032 at a CAGR of 25.88% over the forecast period (2024-2032). Asia Pacific dominated the solar photovoltaic (PV) market with a market share of 49.16% in 2023. Solar energy is used to convert sunlight into electricity by using photovoltaic effect technology.

How is the solar photovoltaic market segmented?

The Solar Photovoltaic (PV) Market is segmented by product type, end-user, deployment and geography. By product, the market is segmented by thin film, multi-si, and mono-si. By end-user, the market is segmented by residential, commercial, and utility. By deployment, the market is segmented into ground-mounted and rooftop solar.

Why is the solar photovoltaic market growing?

The government in many countries has imposed stringent carbon emission norms due to which the focus towards the renewable sector is increasing, particularly towards solar photovoltaic generation. This is expected to push this market towards growth during the forecast period. Request a Free sample to learn more about this report.
