

# Photovoltaic bracket pipe clamp

Will S-5 clamps Pierce metal roof panels?

S-5! Clamps & Brackets for Metal Roof Solar Panel Systems Attachment of solar panel system arrays on a metal roof has always been difficult and often the source of leaks and maintenance problems until and brackets. Thanks to their patented round-point setscrews, S-5! clamps will not pierce the metal roof paneling or violate system warranties.

What is a S-5 clamp & bracket?

Clamps Designed for standing seam and concealed-fix metal roof profiles, S-5! clamps can be used to mount ancillary components directly to the roof seams, without the need for any additional interfacing hardware. S-5! Brackets S-5! brackets are designed for mounting on exposed-fix (face-attached or thru-fastened) metal roofs.

What is a SnapNRack metal roof seam clamp system?

This SnapNRack metal roof seam clamp system is for both residential and commercial solar panel metal roof mount installations without metal penetrations.

What is a metal roof clamp?

The clamp is made from high tensile strength aluminum and has two models that will work with multiple metal roof designs including single and double rolled seams or similar designs. This allows a completely engineered system that is simple, robust, and efficient with the lowest possible total installed cost.

Can a top module clamp be used as a mid or end clamp?

Our top module clamp can be used as a Mid or End Clamp for solar installations. We combined our 3.1 rails with locally sourced 2-inch schedule 40 pipe to build a simple, low-cost structure with columns of 3 or 4 modules in landscape orientation. Side of Pole and Top of Pole options that accommodate modules from 10 watts to 300+watts.

What is the difference between S5 clamps and mini clamps?

The versatile, simple design and the ample size make original S-5! clamps strong enough to be perfect for the long solar panel strings typical of large commercial and industrial solar systems. The Mini version of S5! clamps are bit shorter than their standard counterparts. Mini Clamps have in their base rather than two. Mini Clamps
