

Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect ® Solar, thyssenkrupp Steelnow offering high-performance, zinc-magnesium-coated steels for PV mounting systems - durable, robust and sustainable.

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect ® Solar offers several advantages compared to pure zinc coatings.

What is Zm ecoprotect ® solar?

With ZM Ecoprotect ® Solar, we are clearly offering extra sustainability. It conserves resources through reduced use of zinc, it is 100 percent recyclable, and the entire portfolio is also available as blue mint ® Steel - our high-quality flat steel with reduced CO₂ intensity and the same excellent material and processing properties.

How many gigawatts of photovoltaics will Germany have in 2022?

Based on 2022, an additional capacity of only 7.5 gigawatts has been installed, which is not nearly enough to build the total planned capacity of 215 gigawatts of photovoltaics in Germany by 2030. Capacities must be built up, especially in the free-field sector, in order for new solar installations to be connected to the grid on the desired scale.
