

Photovoltaic brackets for Hong Kong farm sheds are customized on demand

How to promote the installation of solar photovoltaic systems in Hong Kong?

To facilitate the attainment of this objective and promote the wider installation of renewable energy systems by private sector on their land and properties in Hong Kong, Lands Department ("LandsD") has introduced facilitation measures on the installation of solar photovoltaic ("PV") systems¹ in private developments² under lease³. 2.

What are the different types of photovoltaic systems in Hong Kong?

Photovoltaic systems in Hong Kong can be classified into two main types - stand-alone systems and grid-connected systems. These can further be divided into ordinary photovoltaic systems and building-integrated photovoltaic (BIPV) systems.

When is a solar photovoltaic system a part of the FiT scheme?

System intended for participation in the FiT Scheme in areas where "Public Utility Installation" is a Column 2 use under the statutory plan concerned. The Assessment Criteria for Considering Applications for Solar Photovoltaic System made under Section 16 of the Town Planning Ordinance (Cap. 131) is

Will floating solar farms work in Hong Kong's Kai Tak & Shing Mun Rivers?

This project successfully demonstrated the viability of the floating solar farm concept, so the HKSAR Government Drainage Services Department subsequently commissioned Binnie to expand the feasibility study of floating PV systems to Hong Kong's Kai Tak and Shing Mun rivers.

How does a standalone photovoltaic system work?

(a) Standalone photovoltaic systems operate without any interaction with the utility grid. Most standalone photovoltaic systems comprise of solar panels, a charge controller and storage batteries to supply power to DC loads. If the system has to supply power to AC loads, an inverter is needed to convert the DC power into AC power.

What should a property owner know about solar PV systems?

The lot or property owner should ensure that the electricity generated from the proposed solar PV systems would not be significantly in excess of that normally required by the occupiers concerned and for the building or accommodation within the lot that it serves. The space underneath the solar PV systems shall not in any event be enclosed.
