

Are ground mounting steel frames suitable for PV solar power plant projects?

In the photovoltaic (PV) solar power plant projects, PV solar panel (SP) support structure is one of the main elements and limited numerical studies exist on PVSP ground mounting steel frames to be a research gap that has not be addressed adequately in the literature.

Are solar panel support configurations feasible in closed sanitary landfills?

Objective: To analyze the structural feasibility of solar panel support configurations in closed sanitary landfills for better use of these spaces, thus increasing the country's capacity to generate renewable energy in areas where the affectation of ecosystems is low or null.

Can thin glass be used in photovoltaic modules?

Some research studies were conducted to support the determination of the location and height of the C-channel rail or the use of thin glass in photovoltaic modules .

Abstract. An improved understanding of the effects of floating solar platforms on the ecosystem is necessary to define acceptable and responsible real-world field implementations of this new marine technology. This study examines a ...
