

Photovoltaic horizontal linkage tracking bracket

1 Introduction. In the first utility-scale photovoltaic (PV) installations, the cost of the PV modules clearly exceeded 50% of the total cost of the installation. [] For this reason, two-axis solar tracking systems allowing the optimal perpendicular ...

The horizontal single-axis tracking system is mainly applied in the middle and low latitudes, and a pair of horizontal single-axis strings are connected by a set of driving devices to achieve synchronous tracking of multiple strings.
