

What is the market share of solar PV inverters in 2023?

According to the Solar Energy Industries Association (SEIA), prices for solar PV installations have fallen 43% over the last 10 years in California, U.S. Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023.

Why is the PV inverter market growing?

Increased global PV demand: The increased global demand for photovoltaic (PV) systems presents a massive opportunity for the PV inverter market to grow substantially in the coming years.

What is the global PV inverter market size?

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030.

How is the solar PV inverter market segmented?

By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters. By application, the market is segmented into residential, commercial and industrial, and utility-scale. The report also covers the market size and forecasts for solar PV inverters across major regions.

What is solar PV inverter?

Solar PV accounted for approximately 4.5% of total global electricity generation in 2022. Solar PV inverters are an integral part of larger solar systems. These inverters convert direct current (DC) electricity to alternate current (AC) and hence determine efficiency of whole solar system.

How big is the Asia Pacific PV inverter market?

The Asia Pacific PV inverter market size held over USD 10.5 billion in 2022. Developing countries and regions with favorable solar conditions have become significant markets for PV inverters and solar installations. Stringent environmental regulations to increase adoption of renewable energy including solar will augment the business scenario.

The PV inverter market size crossed USD 13.32 billion in 2023 and is projected to witness 7.7% CAGR from 2024 to 2032, driven by the rising demand for clean and sustainable energy on the account of the growing concerns regarding ...

The Global Solar PV Inverter Market is segmented by inverter type, including central inverters, string inverters, and micro inverters, and by application, encompassing residential, commercial and industrial (C& I), and utility-scale ...
