

What is independent photovoltaic power generation?

Independent photovoltaic power generation is also called an off-grid photovoltaic system, which is different from a grid-connected system by adding a controller, battery, and AC inverter. Sunrise company China has thousands of solar system solutions, focusing on the design of the distributed photovoltaic system.

Is integrated photovoltaic power generation a good choice for green enterprises?

Integrated photovoltaic power generation has become an inevitable choice for green enterprises that are energy-saving, emission-reducing, low-carbon, and environmentally friendly.

What are the different types of photovoltaic power generation systems?

The photovoltaic power generation system is divided into an independent photovoltaic system and a grid-connected photovoltaic system. Independent photovoltaic power generation is also called an off-grid photovoltaic system, which is different from a grid-connected system by adding a controller, battery, and AC inverter.
