

Photovoltaic operation and maintenance channel board installation

What is operation & maintenance (O&M) of photovoltaic (PV) systems?

This guide considers Operation and Maintenance (O&M) of photovoltaic (PV) systems with the goal of reducing the cost of O&M and increasing its effectiveness. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more predictable.

Do photovoltaic systems need maintenance?

The expansion of photovoltaic systems emphasizes the crucial requirement for effective operations and maintenance, drawing insights from advanced maintenance approaches evident in the wind industry. This review systematically explores the existing literature on the management of photovoltaic operation and maintenance.

What are NREL's best practices at the end of photovoltaic system performance period?

NREL's Best Practices at the End of the Photovoltaic System Performance Period report includes recommendations for system owners, asset managers, and industry service providers regarding the handling and disposal of waste, including reuse and recycling of PV modules and other components as a way to reduce environmental impact.

Should a general contractor install a solar PV system?

A general contractor may face a choice between using an electrical subcontractor or a solar subcontractor to install the PV system. A good solar contractor will have the expertise in solar PV systems plus qualified electricians on staff.

Are O&M processes for PV systems fully structured?

Compared to well-established technologies such as hydro, thermal, and wind, the O&M processes for PV systems are not yet fully structured in many operating companies. In particular, the wind industry has made substantial progress in O&M, as evidenced by the extensive research landscape.

Why should a roof maintenance provider meet with a PV O&M team?

Failure to provide for maintenance of a roof system may result in roof-system failure, thereby necessitating PV system removal for roof repair/replacement, which is bad for the prospects of the PV system. By meeting, the roof maintenance provider can share particular areas of concern with the PV O&M team, and vice versa.
