

Based on 210mm silicon wafer and 132 half-cut mono-crystalline PERC cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher output power up to 670W. Excellent temperature coefficient ...

Half-cut Cells Advantages. (1) The solar cell is divided into two, the main gate current is halved, the current loss of the whole component is reduced to 1/4 of the original, and the output power is about 5-10W higher than that of the same ...
