

The main parts for solar street light system are solar panel, solar charge controller, battery, inverter, pole, LED Light. Below we will briefly mention basic features of each part: o PV module - converts sunlight into DC electricity.

The brightness level of LED light can be adjusted by regulating the efficiency. For example, the efficiency of street light can be adjusted to 30W before dawn or 15W at the midnight. If doing this, the lighting needs can be realized and the budget ...

1. All in One Solar Street Light - This light is compact where all the components are housed inside a single unit. 2. Semi Integrated Solar Street Light - In this, battery, fixtures, luminary and controller are molded into a single unit and the ...
