

Photovoltaic panel energy saving service

What is a photovoltaic system?

The literal translation of the word photovoltaic is light-electricity--and this is exactly what photovoltaic materials and devices do--they convert light energy into electrical energy. PV systems generate power without pollution--and recent advancements have greatly improved their efficiency and electrical output.

How does energy storage and demand management help to match PV generation?

Energy storage and demand management help to match PV generation with demand. 6 PV conversion efficiency is the percentage of solar energy that is converted to electricity. 7 Though the average efficiency of solar panels available today is 21% 8, some researchers have developed PV modules with efficiencies near 40% 9.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version here.

How do solar panels work on a flat roof?

Solar panels work best when angled towards the sun, so panels on flat roofs are normally tilted up to help maximise energy production. It's important that any solar panel system maintains the integrity of the roof covering to keep it watertight. For this reason, many systems are weighted down rather than fixed through the roof covering.

Do solar panels need planning permission?

Solar PV panels on houses are considered 'permitted development' and don't usually need planning permission. But there are exceptions so it's best to check with your local planning office for guidance. If you live in a listed building, conservation area or national park, there may be additional restrictions.

Photovoltaic/Solar (PV) Services. Energy Savings Pros is an established Northern California photovoltaic/solar developer and installer, and has been voted "Best of the Best" Electrical Contractor and Solar Installer by the 14,000+ Readers of ...
